CloudMail™ is budget-friendly email hosting that has everything business users need.

Not all users need the bells and whistles offered from the big email hosting providers like M365 and Google, so we've created an affordable option that includes the features vital to most businesses while keeping costs low. CloudMail™ provides affordable 25GB hosted email, contacts & calendars. It's easy to split your domains, so the users that need more services can use those, while the users who just need the basics use CloudMail.

Email security Included
Security is seamlessly integrated so there's nothing to install or maintain.

Massive 25GB mailboxes
You'll never have to worry about your inbox size. No more "inbox full" messages!

Flexible access options
Email with your preferred email client via POP3/IMAP, or in our webmail console.

All the email essentials business users need

Keep up with your inbox through our convenient webmail, or in any email client via POP3/SMTP syncing. CloudMail is filtered for spam, virues, phishing attacks, and more, so your people are **protected** from the latest email-based threats. Contacts and Calendar features are included, with full CardDav/CalDav support for syncing.

Save money with split-domains

Not everyone needs all the features of Microsoft 365 or Google Workspace, so you can utilize CloudMail to you split domains into groups. People who email a lot can keep using the more expensive email host, but those who don't use it as much (factory floor workers, temps, interns, etc.) can be split into their own group and put on CloudMail. It's one great way that we help you work **more efficiently while saving money**.
