Email Archiving with unlimited storage and retention at an affordable and predictable cost.

Tap in to the power of a secure, state-of-the-art archiving platform to effectively preserve data, protect intellectual property, comply with data retention regulations, address discovery requests and cut IT costs. When combined with our full suite of email security and management services, SecureStore rounds out a comprehensive business-class email solution.

Affordable
Saves money from the start with no hardware or software to install/maintain

Quick deployment
We've streamlined the setup process, so you're good to go in 20 minutes or less

Easy to use
The intuitive interface is a snap to get around with fast, accurate, reliable search

Preserve and safeguard your data

SecureStore's Email Archiving solution helps organizations efficiently store, safeguard, manage, and discover data from most email systems through Journaling. eDiscovery, Retention and Legal Hold policies and Compliance Review are just a few items that make SecureStore Email Archiving **a strong tool** for your archiving and compliance needs. Lightning-fast search offers 20+ search criteria, no limitations of timeouts and advanced search tools with reusable saved search and email alerts.

Maintain compliance

Regulated by PCI, SEC, GLBA, HIPAA, HITECH, SOX? You're covered. SecureStore provides an easy-to-access archive of ESI, to comply with even the most stringent government mandates, industry regulations and corporate policies.
